## PROFILE

As a frontend developer, I'm passionate about learning and self-improvement. I find joy in designing websites alongside my coding work. I'm driven by the challenge of creating user-friendly digital experiences. With each project, I strive to blend my technical skills with creative design, ensuring every website I work on is both functional and visually appealing. Continuous learning keeps me motivated, allowing me to stay updated with the ever-evolving world of web development.

## PERSONAL PROJECTS

### Personal Portfolio

Portfolio showcasing my frontend development expertise. Featuring an array of personal projects, demonstrating my passion for creating user-friendly digital solutions, including an interactive contact form.

#### React.js TailwindCSS

**Code:** <https://github.com/tidzi17/portfolio-n>

**Preview:** <https://tijanadjportfolio.vercel.app/>

### Barbers Shop

This project integrates a user-friendly booking form for appointments alongside an e-commerce platform, offering a seamless online experience for scheduling services and purchasing grooming products.

#### React.js TailwindCSS

**Code:** <https://github.com/tidzi17/barbers-shop>

**Preview:** <https://barbers-shop.vercel.app/>

### E-commerce

A comprehensive project featuring an eCommerce platform for cosmetics alongside a blog. Seamlessly browse and purchase beauty products while staying informed with engaging beauty-related content.

#### React.js TailwindCSS

**Code:** <https://github.com/tidzi17/e-commerce-project>

**Preview:** <https://purely.vercel.app/>

### Landing Page

Interior design landing page, developed meticulously from a Figma design. It serves as a showcase for attention to detail and commitment to bringing design concepts to life.

#### React.js SCSS

**Code:** <https://github.com/tidzi17/landing-page-interiorDesign>

**Preview:** <https://liam-brooks-landingpage.vercel.app/>

### Weather App

WeatherBy is a user-friendly weather application that delivers real-time weather updates. Users can effortlessly check the current weather, 5-day forecast, and more.

#### VanillaJS SCSS

**Code:** <https://github.com/tidzi17/weather-app>
